

TRUSTED NEIGHBORS

Onion Creek Directory

Business Overview | Workflow | VA Onboarding Guide

Austin, Texas | trustedneighbors.net
Spring 2026 | Vol. 1

1. Business Overview

Trusted Neighbors is a hyper-local neighborhood directory business built around community trust. The flagship product is the Onion Creek Directory — a free online directory at trustedneighbors.net backed by a seasonal printed directory delivered door-to-door. Revenue is generated through vendor advertising tiers, print directory sales, and physical directory product sales.

The Core Concept

- Neighbors submit trusted vendor referrals from the neighborhood Facebook group and Nextdoor
- Listings are free and community-sourced — authenticity is the product
- Vendors can upgrade to paid tiers for featured placement and print inclusion
- A printed directory is sold door-to-door twice a year — Spring and Pre-Holiday editions
- The model is fully scalable to any HOA neighborhood in America

Revenue Streams

Revenue Source	Price	Projected Annual
Free Listings	No charge	N/A — trust builder
Trusted Partner Tier	\$25/month per vendor	\$7,500 - \$13,500
Premium Tier	\$45/month per vendor	Upside on upgrades
Print Directory Sales	\$15/copy (x2/year)	\$3,600 - \$6,000
Print Ad — Full Page	\$150-200/edition	\$1,500 - \$2,000
Print Ad — Half Page	\$85-100/edition	\$680 - \$800
Physical Cover Product	\$25-30 one-time	TBD at launch

Combined projected annual revenue for Onion Creek alone: \$11,000 - \$19,500+

The Physical Directory Product

- Yardage book-style cover — green leatherette, gold lettering, premium feel

- Magnet on the back — lives on the fridge permanently
- Seasonal inserts (Spring/Fall) slide in and out — sold at \$8-10 each
- Cover sold once at \$25-30, inserts create recurring revenue every 6 months
- Produced in bulk through 4imprint, Crestline, or local print suppliers

Publication Schedule

Edition	Target Launch	Why It Works
Spring Vol. 1	March / April	Homeowners starting spring projects — landscaping, repairs, pest control
Pre-Holiday Vol. 2	October / November	Cleaning, handymen, painters — prepping homes for holiday guests

Monetization Philosophy

CRITICAL: Do not charge vendors until the directory has real traffic and community trust established. The sequence is:

1. Build 50-75 real listings from Facebook group and Nextdoor — free, no strings
2. Share in the neighborhood Facebook group and let word spread organically
3. Run for 60-90 days and build measurable traffic via Google Analytics
4. Approach vendors with real data — 'your listing was viewed X times this month'
5. Spring Vol. 1 becomes the first monetized push — digital tiers AND print launch together

The community must embrace the directory as a neighborhood resource first. The 'neighborhood good guy helping' positioning is the entire competitive advantage. Protect it at all costs.

Vendor Tier Structure

Feature	Free	Trusted Partner (\$25/mo)	Premium (\$45/mo)
Name & Phone	Yes	Yes	Yes
Neighbor Note	Yes	Yes	Yes
Print Directory	Yes (name & phone only)	Yes (with note)	Yes (full entry)
Featured Placement	No	Yes	Yes
Trusted Partner Badge	No	Yes	Yes
Business Description	No	No	Yes
Website Link	No	No	Yes

2. Current Status & Infrastructure

Website

Live URL	phenomenal-haupia-2c9908.netlify.app (temporary)
Domain	trustedneighbors.net (propagating — 48hr window)
Hosting	Netlify (free tier) — drag and drop deployment
Design	Masters Tournament-inspired — forest green, gold, clean serif typography
Tech Stack	Single HTML file — no frameworks, no database, no server

Website Features Built

- 7 category groups with expandable subcategories (20 subcategories total)
- Live search filtering across all listings
- Scrollable category navigation — mobile friendly
- Suggest a Referral form — sends to seththomashill@icloud.com via Formspree
- Order a Directory form — sends to seththomashill@icloud.com via Formspree
- Trusted Partner badge and Premium tier styling built in — ready to activate
- Red clickable phone numbers — tap to call on mobile
- All listings are sample data — real referrals to be added by VA

Accounts & Credentials

Service	Purpose	Notes
Netlify	Website hosting	Log in at netlify.com — free tier
Namecheap	Domain registrar	trustedneighbors.net — nameservers pointed to Netlify
Formspree	Form submissions	Form ID: xyknkrrq — free tier
Google Analytics	Call & traffic tracking	To be set up once domain is live — get G-XXXXXXXXXX ID
GitHub	File version control	To be set up — enables VA to update listings without Netlify access

3. Immediate Next Steps

This Week

6. Confirm trustedneighbors.net is live and loading correctly
7. Set up Google Analytics at analytics.google.com — create property for trustedneighbors.net
8. Get Measurement ID (G-XXXXXXXXXX) and share with Claude to add to the site
9. Set up GitHub account and repository for index.html — connect to Netlify for auto-deploy
10. Share VA login credentials for GitHub only — VA should never need Netlify access

First 60-90 Days

11. VA to collect real referrals from Onion Creek Facebook group and Nextdoor
12. Replace all sample listings with real neighbor-sourced referrals
13. Post launch announcement in neighborhood Facebook group
14. Monitor Google Analytics for traffic and call click data
15. Build toward 50-75 real listings before any vendor outreach

Pre-Spring Launch (Monetization)

16. Approach vendors with real traffic data from Google Analytics
17. Pitch Trusted Partner tier (\$25/mo) — 'your competitor is already listed'
18. Begin print directory design — target 10 pages, Spring Vol. 1
19. Sell print ads to vendors — full page, half page, quarter page, back cover
20. Kids sell physical directory door-to-door at \$15/copy

4. Virtual Assistant Job Description

Role Overview

We are looking for a detail-oriented Virtual Assistant to help build and maintain the Onion Creek Directory — a trusted neighborhood business referral website for the Austin, Texas area. This is a part-time remote role starting with a 30-hour internship. No coding experience required.

Primary Responsibilities

Listing Research & Data Entry

- Monitor the Onion Creek neighborhood Facebook group for business referrals posted by neighbors
- Monitor Nextdoor for the Onion Creek area for additional vendor recommendations
- Copy and organize referral information: business name, phone number, category, and neighbor recommendation quote
- Add new listings to the website via GitHub (training provided — no coding required)
- Ensure all listings are real neighbor referrals — do not add businesses that have not been recommended by a neighbor

Quality Control

- Check for duplicate listings before adding new entries
- Verify phone numbers are formatted correctly: (512) 555-0000
- Flag any listings that receive negative feedback from neighbors for review
- Ensure neighbor recommendation quotes are genuine and not copied from business websites

Social Media & Outreach

- Schedule weekly posts sharing directory listings in the neighborhood Facebook group
- Respond to comments and questions about the directory professionally
- Monitor for new referral requests posted by neighbors and follow up

What You Will NOT Do

- You will NOT scrape or automate data collection from Facebook or Nextdoor — this violates their terms of service and risks account bans. All data collection is manual, copy-paste only.
- You will NOT contact vendors or discuss advertising — that is handled by the business owner
- You will NOT have access to Netlify, Formspre, or domain accounts
- You will NOT publish listings without neighbor referral verification

Access & Credentials Required

Tool	Access Level	Notes
GitHub	Collaborator on repo	Edit index.html only — training provided
Facebook	Own personal account	Must be a member of the Onion Creek neighborhood group to view posts
Nextdoor	Own personal account	Must verify Austin, TX address to access local feed
Google Sheet (tracking)	Editor	Log all referrals found before adding to site

Important: Facebook & Nextdoor Access Policy

NEVER use the owner's personal Facebook or Nextdoor credentials. The VA must use their own verified personal account.

- Facebook: Request to join the Onion Creek neighborhood group using your own account. The owner will approve the request.
- Nextdoor: Create your own account and verify with a residential address. Nextdoor requires address verification to access neighborhood feeds. If your address is not in the Onion Creek area, the owner will provide read-only screenshots of relevant posts for data entry.
- VPN: A VPN is NOT required or recommended. Using a VPN on Facebook or Nextdoor can trigger security flags and account restrictions. Use your normal home internet connection only.
- No automation tools: Do not use browser extensions, bots, or scraping tools of any kind on Facebook or Nextdoor. Manual copy-paste only.

The VA Workflow for Adding a Listing

21. Open the neighborhood Facebook group or Nextdoor feed
22. Find a post where a neighbor recommends a local business
23. Note: business name, phone number (if listed), category, and the neighbor's recommendation quote
24. Log the entry in the shared Google Sheet first
25. Open GitHub and navigate to index.html in the repository
26. Find the correct category section in the file
27. Add the new listing following the exact format of existing listings
28. Click 'Commit changes' with a note like 'Added Mike's Plumbing from Facebook referral'
29. Netlify automatically updates the live website within 60 seconds
30. Verify the listing appears correctly on trustedneighbors.net

Listing Format Template

```
{ name:"Business Name", phone:"(512) 555-0000", note:"Neighbor quote here — keep it genuine and in the neighbor's own words." }
```

Hours & Priorities for the 30-Hour Internship

Task	Estimated Hours
Onboarding & GitHub training	2 hours
Facebook group research & listing collection	10 hours
Nextdoor research & listing collection	6 hours
Data entry into website via GitHub	6 hours
Quality control & duplicate checking	3 hours
Social media scheduling & posting	3 hours

Target outcome from internship: 50-75 real verified listings across all categories.

Skills & Qualities We're Looking For

- Attention to detail — listings must be accurate and consistently formatted
- Trustworthy — you are handling community referral data, accuracy matters
- Comfortable with basic web tools — GitHub editing is simple but requires care
- Good written English — neighbor quotes should be lightly edited for clarity if needed
- Self-directed — able to work independently with clear instructions
- Overlap with US Central Time preferred for occasional check-ins

5. The Bigger Picture

Onion Creek is the proof of concept. The playbook is designed to replicate in any HOA neighborhood in America.

- Same website template — swap neighborhood name and local listings
- Same physical directory and yardage book cover product
- Same vendor advertising pitch — \$25/\$45 per month tiers
- Same VA-driven listing management model
- trustedneighbors.net becomes the umbrella brand — each neighborhood gets its own page or subdomain

The competitive moat: authenticity. Every listing is neighbor-sourced. No corporate directory can replicate community trust built at the neighborhood level.

Revenue potential at scale: 50 neighborhoods at conservative estimates = \$550,000+ annual revenue with a VA-managed model.

Build trust first. Monetize second. The directory that feels like a community resource will always outperform the one that feels like a business — even if it's both.
